

## Frequency Control & Timing Devices

Our selection of TCXO and OCXO devices address both over-temperature and long-term stability requirements of Stratum 3/3E/IV architectures needed in mission critical operations and the toughest environments.

## RF & Antennas

Our RF portfolio includes antennas and SAW filters focused on market-leading technology, dynamic performance, high efficiency, wide operating temperature range and durability. Our products are designed to meet the reliability needs of the most challenging environments.

## Inductors & Connectivity

Abrakon offers a wide range of shielded inductors in a variety of package sizes. Capable of operating at broad temperature ranges, these inductors are ideal for A/D applications requiring high power, efficiency and reliability.
